# Yr 1 DT: Houses

Looking at different houses and the materials that have been used to make them.

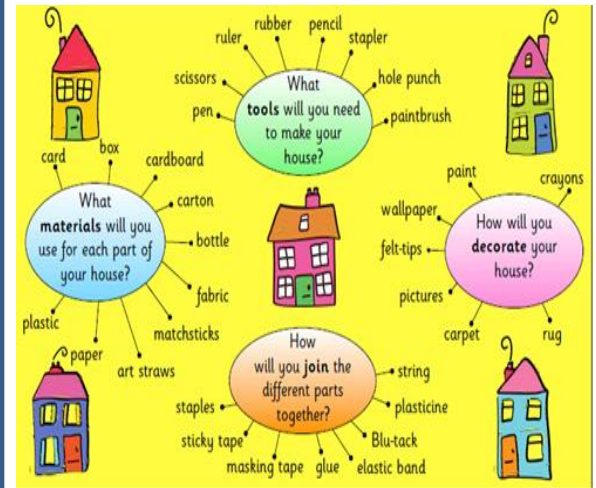

Exploring different ways of joining materials together.

With adult support, we will be using a glue gun as one way to join materials. We will know how to use this equipment safely.

Designing our own house using the information that we have learnt so far, including how to join our pieces together. It must stand up to the wind from the class fan.

Making our house using our choice of materials. Evaluating what we have done. What went well? What could we improve? Did we have to change our plans? Did it meet the criteria?
